

SWASTHERA

Settlement Module

Business Requirements Document

Version 1.0 | March 2026 | CONFIDENTIAL

Prepared by	Swasthera Finance & Product Team
Stakeholders	Finance, BD, Tech, Compliance
Status	Draft – Review in Progress

1. Purpose & Scope

This Business Requirements Document defines the functional and compliance requirements for the Swasthera Settlement Module — an automated, in-house platform to manage end-to-end marketplace settlement with brands operating on the Swasthera platform.

The module covers:

- Brand onboarding with KYB verification and maker-checker approval
- Master data management: Company, Brand, Warehouse, Commission, and Promotion masters
- Fynd OMS integration for order and bag-level state tracking
- TCS and TDS compliance triggered at invoice generation
- Return window management and settlement eligibility logic
- Automated GMV calculation and deduction waterfall
- Finance team approval workflow before payout
- Auto-generation of Commission Invoice and Statement of Claim (SoC) report
- Bank transfer, UTR recording, and post-settlement credit note handling

2. End-to-End User Flow Summary

The module operates across six sequential phases. Each phase is gated — a phase does not proceed until the preceding phase's conditions are met.

Phase 1 — Brand Onboarding

A Finance or BD user (Maker) creates the company, brand, and warehouse records on the Swasthera dashboard. On submission, the system instantly triggers a KYB API call using the PAN to verify the business entity (GST, CIN, Bank). If KYB fails, the Maker is notified and cannot proceed. If KYB passes, the Maker uploads supporting documents (GST certificate, PAN, CIN, cancelled cheque, signed agreement) and configures the commercial terms (commission %, return window days). The Finance Supervisor (Checker) then reviews all records and approves. Only after supervisor approval are the entities considered active.

Phase 2 — Fynd Sync

On supervisor approval, the system automatically POSTs the company, brand, and warehouse records to the Fynd platform via API. Fynd returns unique IDs (fynd_company_code, fynd_brand_id, fynd_location_id), which are stored in an internal mapping table. The warehouse state GSTIN is specifically noted for TCS computation.

Phase 3 — Order Tracking & Compliance

The system captures order_id and bag_id at the payment pre-confirmation stage. All subsequent status updates across all 77 Fynd OMS states are synced via Fynd API and stored per bag_id. When a bag reaches the bag_invoiced state, an auto-generated invoice is emailed to the customer as order confirmation. This event simultaneously triggers the TCS and TDS compliance workflow. Monthly automated filing is required: TCS by the 7th and TDS by the 10th of the following month, covering all transactions including returns.

Phase 4 — Return Window Management

After delivery_done, a return window timer starts for each bag based on the brand's configured return policy. If no return is raised before the window expires, the bag is marked eligible for settlement. If a

return is raised, a settlement hold is placed on the bag. If the return is accepted (return_bag_delivered), the bag is permanently excluded from settlement and TCS/TDS is reversed. If the return is rejected, the hold is lifted and the bag becomes eligible.

Phase 5 — Settlement Computation & Finance Approval

On a bi-monthly cycle, the system collects all eligible bags grouped by company. It applies a deduction waterfall: Gross ESP minus Commission (at order-date rate) minus GST on Commission (18%) minus TCS minus TDS minus MDR and brand-funded promotions, arriving at Net Payable. The system auto-generates a Commission Invoice and a Statement of Claim (SoC) report for each brand. The Finance team reviews the aggregated settlement on the dashboard and approves. Upon approval, the Commission Invoice and SoC are sent to the brand's Finance SPOC.

Phase 6 — Payout

The system initiates a bank transfer (NEFT/RTGS) to the company's registered bank account. The UTR is recorded, the bag_id is marked SETTLED, and a duplicate-payment prevention lock is applied. Final reports are emailed to the brand's SPOC.

3. Data Tables — Master Data Schema

All master data is maintained in Swasthera's internal database. Fynd system IDs are stored post-sync in a separate mapping table. Changes to commission or commercial terms are versioned — historic records are preserved and never overwritten.

3.1 Company Master

Note: One company can have multiple brands. Payment settlement is always made to the company bank account. Commission is tracked at company + brand level.

Field Name	Data Type	Mandatory	Description / Validation
swasthera_company_id	VARCHAR(20)	Auto-gen	Internal unique ID assigned by Swasthera system
fynd_company_code	VARCHAR(30)	Post-sync	Returned by Fynd API after sync; stored for mapping
legal_name	VARCHAR(200)	Yes	Full registered legal name of the company
company_type	ENUM	Yes	Private Ltd / LLP / Partnership / Proprietorship / Public Ltd
pan_number	VARCHAR(10)	Yes	PAN — verified via KYB API; alphanumeric 10 chars
tan_number	VARCHAR(10)	Conditional	Required if TDS is to be credited back to company
cin_number	VARCHAR(21)	Conditional	Required for Private/Public Ltd; optional for others
master_gstin	VARCHAR(15)	Yes	Primary GSTIN used for commission invoice raising
registered_address	TEXT	Yes	Full address with city, state, pincode
state_code	VARCHAR(2)	Yes	Derived from first 2 digits of master_gstin
bank_account_number	VARCHAR(20)	Yes	Settlement bank account number
bank_ifsc	VARCHAR(11)	Yes	IFSC code — verified format check
bank_name	VARCHAR(100)	Yes	Name of the bank
company_spoc_name	VARCHAR(100)	Yes	Primary SPOC at company level for settlements

Field Name	Data Type	Mandatory	Description / Validation
company_spoc_email	VARCHAR(150)	Yes	Email for commission invoice and settlement communications
company_spoc_mobile	VARCHAR(15)	Yes	Mobile number
pan_document_url	URL	Yes	Uploaded PAN copy
gst_certificate_url	URL	Yes	GST registration certificate
cin_document_url	URL	Conditional	CIN certificate if applicable
cancelled_cheque_url	URL	Yes	Bank verification document
signed_agreement_url	URL	Yes	Signed commercial agreement with Swasthera
digital_signature_url	URL	Yes	Authorised signatory's digital signature
kyb_status	ENUM	System	PENDING / PASSED / FAILED
kyb_verified_at	TIMESTAMP	System	Timestamp of KYB API response
maker_user_id	FK	System	User ID of Finance/BD user who created the record
checker_user_id	FK	System	User ID of Finance Supervisor who approved
approval_status	ENUM	System	DRAFT / SUBMITTED / APPROVED / REJECTED
approved_at	TIMESTAMP	System	Timestamp of supervisor approval
active_from_date	DATE	System	Date brand becomes active; set on approval
status	ENUM	System	ACTIVE / INACTIVE / SUSPENDED
created_at	TIMESTAMP	System	Record creation timestamp
updated_at	TIMESTAMP	System	Last update timestamp

3.2 Brand Master

Note: Many-to-many mapping between company and brand (a brand can be sold by multiple companies if the company is a trading entity). Return window is configured at brand level.

Field Name	Data Type	Mandatory	Description / Validation
brand_code	VARCHAR(20)	Auto-gen	Internal unique brand code assigned by Swasthera
fynd_brand_id	VARCHAR(30)	Post-sync	Returned by Fynd API after sync
swasthera_company_id	FK	Yes	Links to Company Master — payment at company level
brand_name	VARCHAR(200)	Yes	Brand display name as listed on platform
brand_legal_name	VARCHAR(200)	Yes	Legal entity name owning the brand
brand_category	VARCHAR(100)	Yes	Primary product category (e.g., Pharma, Wellness, OTC)
brand_type	ENUM	Yes	MANUFACTURER / RETAILER / TRADER / DISTRIBUTOR
brand_gstin_list	JSON	Yes	Array of GSTINs active for this brand (multi-state)
return_window_days	INTEGER	Yes	Brand-specific return window in calendar days
tcs_applicable	BOOLEAN	Yes	Flag: whether TCS collection applies to this brand
brand_spoc_name	VARCHAR(100)	Yes	Finance SPOC at brand level for report delivery
brand_spoc_email	VARCHAR(150)	Yes	Email for SoC, payout reports
brand_spoc_mobile	VARCHAR(15)	Yes	Mobile number of brand SPOC
status	ENUM	System	ACTIVE / INACTIVE
created_at	TIMESTAMP	System	Record creation timestamp
updated_at	TIMESTAMP	System	Last update timestamp

3.3 Warehouse Master

Note: Each warehouse may have a different state GSTIN. The warehouse state GSTIN determines the state for TCS filing. A brand may have warehouses in multiple states.

Field Name	Data Type	Mandatory	Description / Validation
warehouse_code	VARCHAR(20)	Auto-gen	Internal unique warehouse code
fynd_location_id	VARCHAR(30)	Post-sync	Returned by Fynd API after sync
swasthera_company_id	FK	Yes	Links to Company Master
brand_code	FK	Yes	Brand this warehouse is associated with
warehouse_name	VARCHAR(200)	Yes	Display name of warehouse or fulfilment centre
address_line1	VARCHAR(200)	Yes	Registered address line 1
address_line2	VARCHAR(200)	No	Address line 2
city	VARCHAR(100)	Yes	City
state	VARCHAR(100)	Yes	State — drives TCS state determination
pincode	VARCHAR(10)	Yes	Pincode
state_gstin	VARCHAR(15)	Yes	GSTIN for this warehouse state — used in TCS filing
state_code	VARCHAR(2)	Yes	First 2 digits of state_gstin
drug_license_number	VARCHAR(50)	Conditional	Required for pharma/scheduled drug warehouses
drug_license_url	URL	Conditional	Upload of drug license document
status	ENUM	System	ACTIVE / INACTIVE
created_at	TIMESTAMP	System	Record creation timestamp
updated_at	TIMESTAMP	System	Last update timestamp

3.4 Commission Master

Note: Commission is versioned. When a rate changes, the current record's effective_to_date is set and a new record is created with the new effective_from_date. Orders are always settled at the rate prevailing on the order date.

Field Name	Data Type	Mandatory	Description / Validation
commission_id	AUTO_INCREMENT	Auto-gen	Internal ID
swasthera_company_id	FK	Yes	Company for which commission applies
brand_code	FK	Yes	Brand within company — commission is at company + brand level

Field Name	Data Type	Mandatory	Description / Validation
commission_type	ENUM	Yes	FLAT_PERCENT / TIERED
commission_percent	DECIMAL(5,2)	Conditional	Used if FLAT_PERCENT type
tier_config	JSON	Conditional	Array of {min_gmv, max_gmv, rate} for TIERED type
effective_from_date	DATE	Yes	Commission applies from this date — historic record preserved
effective_to_date	DATE	System	System-set when superseded by a new record; NULL if current
is_current	BOOLEAN	System	TRUE only for the currently active commission record
agreed_by_maker_id	FK	Yes	User who entered the commercial terms
approved_by_checker_id	FK	Yes	Supervisor who approved
notes	TEXT	No	Any additional commercial notes
created_at	TIMESTAMP	System	Record creation timestamp

3.5 Promotion Master

Note: Required for reconciling brand-funded vs. marketplace-funded discounts from the Fynd order report. The four Fynd columns (brand_discount, marketplace_discount, coupon_amount, applied_promo_code) are mapped to this table.

Field Name	Data Type	Mandatory	Description / Validation
promotion_id	AUTO_INCREMENT	Auto-gen	Internal ID
fynd_coupon_id	VARCHAR(50)	Yes	Coupon/promotion ID from Fynd system — used for reconciliation
promotion_code	VARCHAR(50)	Yes	Human-readable promo code
brand_code	FK	Yes	Brand to which this promotion is attached
promotion_type	ENUM	Yes	BRAND_FUNDED / MARKETPLACE_FUNDED / SPLIT
brand_funding_percent	DECIMAL(5,2)	Conditional	% of discount borne by brand (0-100)

Field Name	Data Type	Mandatory	Description / Validation
marketplace_funding_per cent	DECIMAL(5,2)	Conditional	% of discount borne by Swasthera marketplace
discount_type	ENUM	Yes	FLAT_AMOUNT / PERCENT
discount_value	DECIMAL(10,2)	Yes	Flat amount or % value
max_discount_cap	DECIMAL(10,2)	No	Maximum discount cap per order
applicable_on	ENUM	Yes	ORDER / PRODUCT / CATEGORY
valid_from	DATETIME	Yes	Promotion validity start
valid_to	DATETIME	Yes	Promotion validity end
is_stackable	BOOLEAN	Yes	Whether this promo can be combined with another
status	ENUM	System	ACTIVE / EXPIRED / DISABLED
created_at	TIMESTAMP	System	Record creation timestamp

4. Fynd OMS Order State Mapping

All 77 Fynd OMS bag states and order states are synced via Fynd API. The table below maps key states to the actions they trigger in the settlement and compliance engine. States not listed trigger no action — they are stored for audit trail purposes only.

Key: ★ = critical decision state that changes settlement eligibility or compliance liability

Fynd OMS State	State Type	Settlement Action	Compliance Action	Reversal?
pending	Bag	No action	No action	N/A
payment_failed	Bag	No action; bag excluded	No action	N/A
placed	Order	Capture order_id + bag_id	No action	N/A
bag_confirmed	Bag	Start tracking bag	No action	N/A
bag_invoiced ★	Bag	Begin return window tracking	TCS + TDS ACCRUAL TRIGGERED	N/A
bag_packed	Bag	No action	No action	N/A
bag_picked	Bag	No action	No action	N/A
in_transit	Bag	No action	No action	N/A
out_for_delivery	Bag	No action	No action	N/A
delivery_done ★	Bag	Return window TIMER STARTS	No action	N/A
return_window_expired ★	Computed	Bag marked ELIGIBLE for settlement	No action	N/A
return_initiated	Bag	Settlement HOLD placed on bag_id	No action	N/A
return_bag_picked	Bag	Hold maintained	No action	N/A
return_bag_received	Bag	Hold maintained	No action	N/A
return_bag_delivered ★	Bag	Bag EXCLUDED from settlement permanently	TCS + TDS REVERSED	Yes — reversal
return_request_cancelled	Bag	Hold LIFTED; bag re-eligible	No action	N/A
cancelled_customer	Bag	Bag EXCLUDED; no settlement	TCS + TDS REVERSED if previously invoiced	Yes if invoiced
cancelled_fynd	Bag	Bag EXCLUDED; no settlement	TCS + TDS REVERSED if previously invoiced	Yes if invoiced

Fynd OMS State	State Type	Settlement Action	Compliance Action	Reversal?
cancelled_brand	Bag	Bag EXCLUDED; no settlement	TCS + TDS REVERSED if previously invoiced	Yes if invoiced
rto_initiated	Bag	Bag EXCLUDED from settlement	No action	N/A
rto_bag_delivered	Bag	Bag EXCLUDED; mark as RTO loss	TCS + TDS REVERSED	Yes — reversal
refund_initiated	Financial	Red flag for review; no settlement action	Monitor for credit note	N/A
refund_processed	Financial	Credit note issued post-settlement if needed	Adjust TCS/TDS ledger	Credit note
partially_delivered	Bag	Only delivered qty eligible for settlement	TCS/TDS on delivered qty only	N/A
delivery_failed	Bag	Bag EXCLUDED; re-attempt or RTO	No action	N/A

4.1 State-Driven Logic Summary

Order Confirmed for Settlement: A bag is confirmed for settlement when it reaches `delivery_done` AND the return window (configured per brand) expires with no active return. Both conditions must be true simultaneously.

Return Confirmed — Settlement Excluded: If `return_bag_delivered` is received, the bag is permanently excluded from settlement. Any previously accrued TCS and TDS for that bag is reversed. If the return is rejected by the merchant or delivery partner, the bag reverts to eligible status.

Cancellation Handling: Any cancellation state (`cancelled_customer`, `cancelled_fynd`, `cancelled_brand`) before `bag_invoiced` requires no compliance action. Cancellation after `bag_invoiced` triggers a TCS and TDS reversal entry.

RTO Handling: RTO bags follow the same logic as accepted returns — permanently excluded, TCS and TDS reversed.

5. Compliance Workflow — TCS & TDS

Compliance is triggered at the bag_invoiced OMS state — the moment an invoice is auto-generated on behalf of the brand. This is the defining event for both TCS and TDS accrual. Settlement cannot proceed independently of compliance — all TCS and TDS entries must be reconciled before the settlement cycle is closed.

5.1 Compliance Calendar

Activity	Trigger	Due Date	Responsible	System Action
TCS Accrual	bag_invoiced state received	Real-time	System (automated)	Accrue TCS on invoice amount per warehouse state GSTIN
TDS Accrual	bag_invoiced state received	Real-time	System (automated)	Accrue TDS on commission amount per company GSTIN/PAN
TCS Reversal	return_bag_delivered / cancellation post-invoice	Real-time	System (automated)	Reverse TCS entry for the specific bag_id
TDS Reversal	return_bag_delivered / cancellation post-invoice	Real-time	System (automated)	Reverse TDS entry for the specific bag_id
Monthly TCS Liability Finalisation	1st of following month	1st of month	Finance CA / Compliance team	System provides TCS summary report per state; CA validates
TCS Payment to Government	Monthly cycle	7th of following month	Finance team	System flags outstanding TCS; payment triggered manually via portal
Monthly TDS Liability Finalisation	1st of following month	1st of month	Finance CA / Compliance team	System provides TDS summary report per company; CA validates
TDS Payment to Government	Monthly cycle	10th of following month	Finance team	System flags outstanding TDS; payment triggered manually via portal
TCS Return Filing (Form 27EQ)	Quarterly	15th of month after quarter end	Finance CA	Consolidated quarterly TCS data export from system
TDS Return Filing (Form 26Q)	Quarterly	31st of month after quarter end	Finance CA	Consolidated quarterly TDS data export from system

5.2 TCS — Tax Collected at Source (GST)

TCS under GST is collected by Swasthera as an e-commerce operator from every brand (supplier) on the net taxable value of supplies made through the platform.

Parameter	Value / Source
Applicable Section	Section 52 of CGST Act (E-Commerce Operator — TCS)
Rate (CGST + SGST each)	0.5% each = 1% total on net taxable supplies
IGST Rate	1% where inter-state supply
Base Amount	Net value of taxable supplies made through Swasthera in the state
Basis	Invoice amount per bag; warehouse state GSTIN determines filing state
Monthly Netting	Returns and refunds for the month reduce net TCS liability
Filing Form	GSTR-8 (monthly)
Recipient Benefit	Brand can claim TCS credit in their GSTR-2A/2B filings

5.3 TDS — Tax Deducted at Source (Income Tax)

TDS under Section 194-O is deducted on the gross sale consideration (ESP) credited to the brand's account. It is deducted at the time of settlement — i.e., when the net amount is credited or before.

Parameter	Value / Source
Applicable Section	Section 194-O of Income Tax Act (E-Commerce TDS)
Rate	1% of gross amount paid / credited to seller
Base Amount	Gross sale consideration (ESP) at time of credit / payment
Threshold	TDS applicable only if aggregate payments exceed INR 5 lakh in the financial year
TAN Requirement	Brand must provide TAN; otherwise TDS remitted to Government — brand may claim as advance tax
Filing Form	Form 26Q (quarterly)
Certificate	Form 16A issued to brand quarterly; reflected in Form 26AS
Credit Note Impact	TDS is adjusted when credit notes are raised for returns post-settlement

5.4 Compliance for Returns

For every return confirmed (return_bag_delivered), the system reverses the TCS and TDS accrual for that bag_id in the current month's ledger. If the return occurs in a month after the original invoice (cross-month return), the reversal is applied in the month the return is confirmed — reducing that month's net TCS and

TDS liability. This ensures the monthly net liability figure is always correct before the 7th / 10th filing deadline.

5.5 Post-Settlement Returns — Credit Note Handling

If a return or refund is raised after the settlement has already been paid out to the brand, the system does not re-initiate a reverse bank transfer. Instead: (a) a credit note is raised against the commission invoice; (b) the TCS and TDS adjustments are captured in the next compliance cycle; and (c) the credit note amount is deducted from the brand's next settlement cycle.

6. GMV Calculation, Deduction Waterfall & Approval Flow

Settlement computation is fully automated. The engine runs on a bi-monthly cycle. Finance team interaction is limited to the approval step — the system handles all calculations.

6.1 Deduction Waterfall

Rule: Commission rate is always the rate in effect on the order's created_at date, not the current rate. This requires querying the Commission Master for the historically effective record.

Step	Line Item	Formula / Source	Note
1	Gross Merchandise Value (GMV)	SUM(ESP per eligible bag_id)	ESP = Effective Selling Price as on Fynd order report
2	Less: Brand-funded Promotion	SUM(brand_discount per bag_id)	Source: Fynd order report — brand_discount column
3	Less: Marketplace-funded Promotion	SUM(marketplace_discount per bag_id)	Marketplace bears this; deducted from Swasthera revenue, NOT from brand payout
4	Net Payable Before Commission	Step 1 minus Step 2	Marketplace promotions do not reduce brand payout
5	Less: Commission	Step 4 × Commission % (at order-date rate)	Rate from Commission Master on order_created_at date
6	Less: GST on Commission (18%)	Step 5 × 18%	GST on the commission charged; invoiced on company Master GSTIN
7	Less: TCS	Per bag TCS accrual (1% of taxable supply)	Per warehouse state GSTIN; already accrued on invoice date
8	Less: TDS	Per bag TDS accrual (1% of gross ESP)	Per company GSTIN/TAN; as per Section 194-O
9	Less: MDR (Payment Gateway)	As per PGW agreement per transaction	Passed through at actuals
10	= Net Payable to Brand	Sum of above deductions from Step 4	Transferred to company bank account via NEFT/RTGS

6.2 Approval Flow

Step	Actor	Action	System Behaviour
1	System (automated)	Identify eligible bags — bi-monthly cycle (1st–15th and 16th–end of month)	Filter: delivery_done + return window expired + no active return + payment reconciled
2	System (automated)	Group bags by company_id; apply deduction waterfall per brand	Commission Master rate on order date; promo split from Fynd order report
3	System (automated)	Generate Settlement Statement (aggregated per company)	Shows: GMV, each deduction line, Net Payable per brand, grand total per company
4	System (automated)	Auto-generate Commission Invoice + SoC per brand	Commission Invoice: Swasthera billed to company Master GSTIN, digital signature; SoC: transaction-level detail
5	Finance Team	Review settlement dashboard — company-level aggregated view	Dashboard shows: brand-wise breakdown, total net payable, flag for any anomalies
6	Finance Team	Approve or Reject settlement for each company	If Rejected: comments entered, system sends back for recalculation; If Approved: proceeds to payout
7	System (on approval)	Trigger bank transfer; email Commission Invoice + SoC + payout report to brand SPOC	Payout report includes UTR, per-bag settlement detail, TCS/TDS certificates

6.3 Key Rules & Guard Conditions

- No bag_id can appear in more than one settlement cycle — duplicate prevention lock is set on SETTLED status
- Settlement is initiated ONLY after the return window has expired for that bag_id
- If a return is active (return_initiated), the bag is placed on hold and excluded from the current settlement cycle
- If a return is accepted (return_bag_delivered), the bag is permanently excluded — no settlement ever
- If a return is rejected, the bag is re-added to the next eligible cycle
- Payment is always made to the company bank account — never to a brand-level account
- Commission % for the same brand can differ across different companies — always use the company + brand combination to look up the rate

7. Report Formats

All reports are auto-generated by the system. No manual compilation is required. Reports are accessible from the Swasthera dashboard and emailed to respective SPOCs on the trigger events listed below.

7.1 Statement of Claim (SoC) — Field Specification

Note: The SoC is the primary transaction-level settlement report. It is sent to the brand's Finance SPOC alongside the Commission Invoice upon Finance team approval.

Column #	Field Name	Source	Description
1	Settlement Cycle	System	Cycle identifier: e.g. MAR-2026-C1
2	Order ID	Fynd	Fynd order_id
3	Bag ID	Fynd	Fynd bag_id — unique per product line
4	Order Date	Fynd	order_created_at date
5	Invoice Date	Fynd	bag_invoiced_at date — TCS/TDS accrual date
6	Delivery Date	Fynd	delivery_done_at date
7	Return Window Expiry	Computed	Delivery date + brand return_window_days
8	Product Name	Fynd	Item / SKU name
9	SKU Code	Fynd	SKU identifier
10	Quantity	Fynd	Units sold
11	MRP	Fynd	Maximum Retail Price
12	Effective Selling Price (ESP)	Fynd	Actual price paid by customer
13	Brand-funded Discount	Fynd	Promo discount borne by brand
14	Marketplace-funded Discount	Fynd	Promo discount borne by Swasthera
15	Net ESP (after brand discount)	Computed	ESP minus brand-funded discount
16	Commission %	Commission Master	Rate on order date
17	Commission Amount	Computed	Net ESP × Commission %
18	GST on Commission (18%)	Computed	Commission Amount × 18%
19	TCS Amount	Compliance Engine	Computed at 1% of taxable supply — per state
20	TDS Amount	Compliance Engine	Computed at 1% of gross ESP — per company TAN

Column #	Field Name	Source	Description
21	MDR Amount	PGW	Payment gateway deduction at actuals
22	Net Payable	Computed	Col 15 - 17 - 18 - 19 - 20 - 21
23	Bag Settlement Status	System	ELIGIBLE / HOLD / SETTLED / EXCLUDED
24	Delivery Status	Fynd	Current OMS bag state
25	Return Status	Fynd	NONE / INITIATED / ACCEPTED / REJECTED
26	UTR (if settled)	Banking	Unique Transaction Reference from NEFT/RTGS
27	Settlement Date	System	Date payout was transferred

7.2 All Reports Overview

Report Name	Audience	Frequency	Key Fields	Trigger
Statement of Claim (SoC)	Brand Finance SPOC	Per settlement cycle	All 27 fields per bag_id (see above)	On Finance approval of settlement
Commission Invoice	Brand (billing)	Per settlement cycle	Invoice no, date, company GSTIN, commission amount, GST, total	On Finance approval of settlement
Payout Report	Brand Finance SPOC	Per settlement cycle	Bag ID, net payable, UTR, settlement date	After bank transfer confirmed
TCS Certificate	Brand compliance team	Monthly	TCS amount per state, GSTIN, filing period, challan ref	Post government filing by 7th
TDS Certificate (Form 16A)	Brand compliance team	Quarterly	TDS amount, TAN, PAN, assessment year, Form 26AS reflection	Post quarterly TDS return filing
Transaction & Net Payable Report	Brand dashboard	Real-time / daily	Bag ID, ESP, status, net payable, settlement eligibility flag	Continuous — dashboard view
Gross Payable Report	Brand dashboard	Real-time	Bags in return window — estimated future payable	Continuous

Report Name	Audience	Frequency	Key Fields	Trigger
Monthly TCS Summary	Finance / CA	Monthly by 1st	Total TCS accrued, reversed, net due — per state GSTIN	1st of following month
Monthly TDS Summary	Finance / CA	Monthly by 1st	Total TDS accrued, reversed, net due — per company TAN	1st of following month
Settlement Ledger	Finance reconciliation	Per cycle	Company, cycle, gross GMV, deductions, net payable, UTR, status	Per settlement cycle closure
Post-Settlement Credit Notes	Finance + Brand	As required	Credit note no, original bag_id, return amount, TCS/TDS adjustment	On post-settlement return confirmation

7.3 Commission Invoice — Key Requirements

- Raised by Swasthera against the brand's company Master GSTIN
- Includes: Invoice number, Invoice date, Swasthera GSTIN, Company GSTIN, HSN/SAC code for commission services (SAC 9983), Commission amount, GST @ 18%, Total amount payable
- Carries a digital signature of the authorised Swasthera signatory
- Generated per settlement cycle per company (all brands consolidated or per brand — to be confirmed with Finance team)
- Emailed to company_spoc_email on Finance approval

8. Open Items & Decisions Required

#	Open Item	Owner	Target Date
1	Confirm whether Commission Invoice is raised per brand or consolidated per company per cycle	Finance + CA	TBD
2	Confirm if local Promotion/Coupon Master is strictly needed or if Fynd's 4 discount columns in order report are sufficient	Finance + Product	TBD
3	Decide TCS filing approach: does Swasthera file consolidated GSTR-8 across all brands or per brand GSTIN?	CA / Compliance	TBD
4	Confirm exact TDS rate: 1% under Section 194-O; verify if any brand is exempt (turnover < INR 5 lakh threshold)	CA	TBD
5	Settlement cycle dates: confirm bi-monthly (1st–15th and 16th–end) or other frequency	Finance	TBD
6	Credit note format: confirm template and whether it is system-generated or manually issued	Finance + Product	TBD
7	Confirm which GSTIN is used for TCS per brand — company master GSTIN or warehouse state GSTIN	CA / Compliance	TBD
8	Dashboard access levels: define which brand roles can see which reports	Product	TBD
